User Story Testing

User Story #29 – Login & Registration

As an assessor I can verify the use of **a role-based login and registration functionality** so that a pass grade may be awarded.

Role-based login

The screenshot below shows how user 'johnwalshe' has staff status. While other users do not. By having staff status only 'johnwalshe' can enter the admin area.

Action:	USERNAME	EMAIL ADDRESS	FIRST NAME	LAST NAME	STAFF STATUS
<input type="checkbox"/>	elas	walshejohnnyw7@gmail.com	Elsa		✖
<input type="checkbox"/>	Jessica	jessie@hotmail.com			✖
<input type="checkbox"/>	johnwalshe	walshejohnnyw7@gmail.com			✓
<input type="checkbox"/>	Rebecca				✖

4 users

Only 'staff' can create and edit events. See in the image below johnwalshe can create and edit events as he is a staff member.

As Rebecca is not 'staff' the option to create events is not present in the header.

The screenshot shows the top navigation bar of the website. It includes links for "Home", "Events", "Your Bookings", and a dropdown menu for "Rebecca". To the right of the navigation is a blue rectangular button with the text "Book Now!" in white.

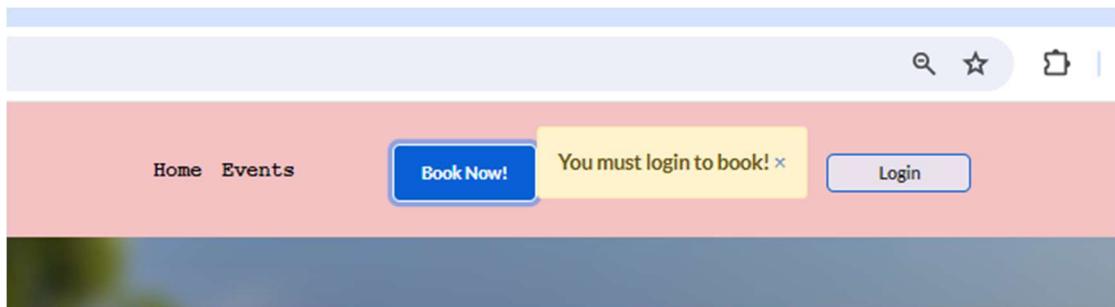

Additionally, Rebecca cannot edit an event as she is not designated staff status.

The screenshot shows the event details page for "The Samhain Hub". It features the same green circular logo and map as the homepage. Below the map is a detailed description of the hub's features, including its location in The Red Chapel and its role as the center of the festivities. It also mentions food trucks, workshops, and performances. At the bottom of the page is a white box containing the text "Welcome back to Kells and the Boyne Valley for our 5th Samhain Festival of Food and Culture." and "Jan. 29, 2024, noon".

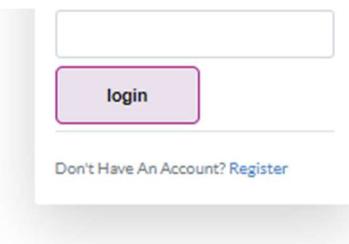

Registration Functionality

Test: Click 'Book Now' button as unregistered user.

Outcome: A flash image presents telling the user they must login to book

The user is then automatically redirected to the login page, where a message saying 'don't have an account? Register' is shown. The user knows he/she must register to login and can proceed.

Upon clicking 'Register' the user is brought to the registration page.

Register

Username*

Required. 150 characters or fewer. Letters, digits and @/./-/_. Only.

Password*

Your password can't be too similar to your other personal information.
Your password must contain at least 8 characters.
Your password can't be a commonly used password.
Your password can't be entirely numeric.

Password confirmation*

Enter the same password as before, for verification.

register

Have An Account? [Login](#)

Test: Input Testperson1 with password &p34K_(8*

Outcome:

Bug: the password feedback info is not updating. Corrected.

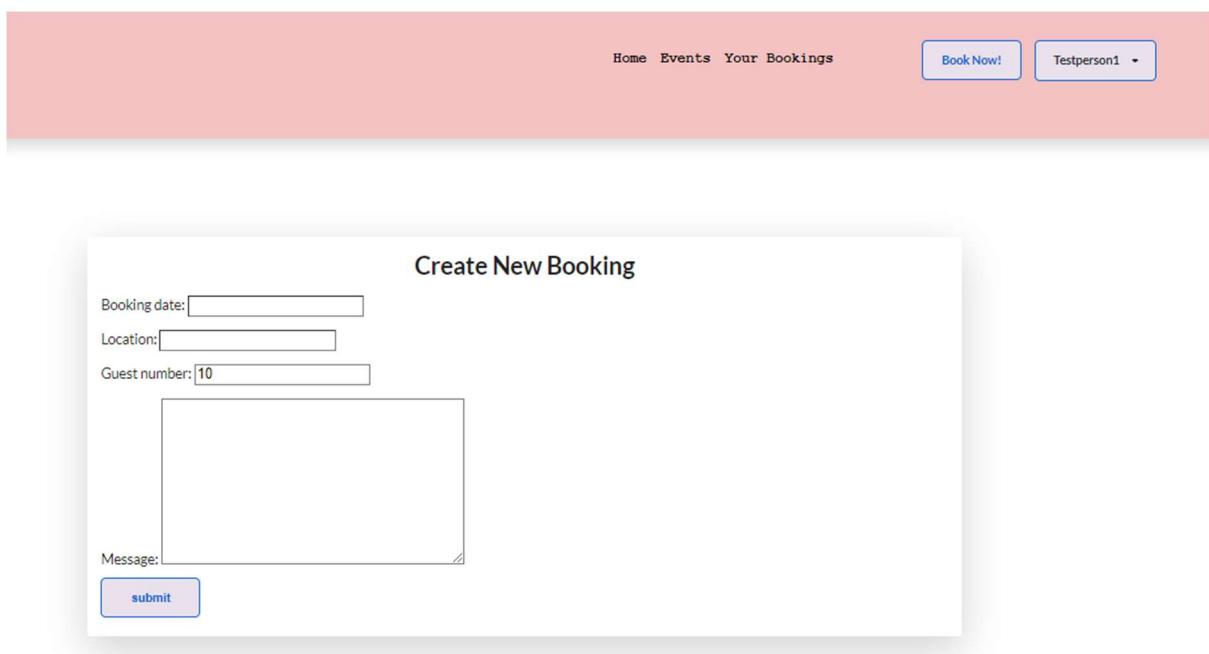

A green flash message presents telling the user their registration has been successful

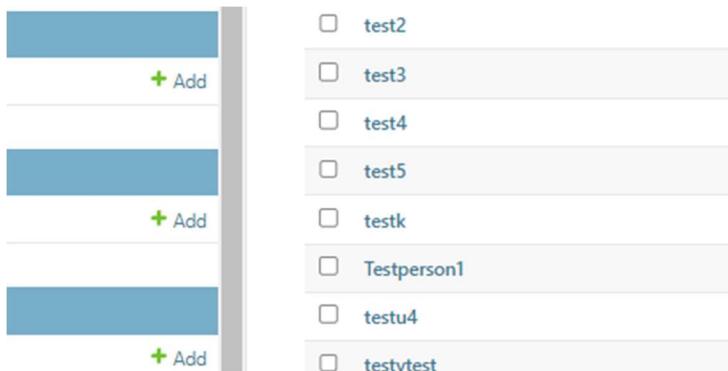

The new users name is presented in the top right of the footer

As a registered 'logged in' user the new user can now create a booking.

The new user can be found in the Django admin – which relates to the database

As a logged in user I wish to book an event by using the browser. This test also covers as a tester I can see evidence of CRUD

Test: Click 'Book Now!' button as a logged in user.

Outcome: User is taken to the 'Create New Booking Page'

127.0.0.1:8000/create_booking/

Home Events Your Bookings Book Now! Rebecca

Create New Booking

Booking date:

Location:

Guest number: 10

Message:

submit

I input the following information and then pressed submit

Booking date: 02/14/2027

Location: 9 Caisleán Mainéar, Athlum

Guest number: 22

This is a test

submit

New booking created

A green success message appears saying 'New booking created'. The booking is also displayed in the 'booking page' on top of the list of other bookings.

New booking created

Rebecca's Bookings

Date: 02/14/2027
Address: 9 Caisleán Mainéar, Athlumney, Navan, Co. Meath
Guest Numbers: 22
Message: This is a test

[Edit](#) [Delete](#)

The new booking is also in the database

Action:	-----	Go	0 of 34 selected
<input type="checkbox"/>	BOOKING		
<input type="checkbox"/>	This is a test		
<input type="checkbox"/>	kkjj		
<input type="checkbox"/>	vlgm		
<input type="checkbox"/>	jhfk		
<input type="checkbox"/>	Thanks		
<input type="checkbox"/>	let me book		
<input type="checkbox"/>	afa		
<input type="checkbox"/>	please workjaj		

As a user I can update the information in my booking.

Outcome: Clicking on 'Your Bookings' brings the user to their bookings. An option to 'Edit' or 'Delete' is clearly visible.

The screenshot shows a user interface for managing bookings. At the top, there is a navigation bar with links for Home, Events, Your Bookings, a Book Now! button, and a user profile for Rebecca. Below the navigation is a header titled "Rebecca's Bookings". Underneath the header, a booking detail is displayed with the following information:

- Date: 02/14/2027
- Address: 9 Caisleán Mainéar, Athlumney, Navan, Co. Meath
- Guest Numbers: 22
- Message: This is a test

Below this information are two buttons: "Edit" (blue) and "Delete" (red).

Clicking 'update' brings the user to the 'create booking page' with all the original information present

The screenshot shows a "Create New Booking" form. At the top, there is a header titled "Create New Booking". The form contains the following fields with the same values as the previous screenshot:

- Booking date*: 02/14/2027
- Location*: 9 Caisleán Mainéar, Athlumney, Navan, Co. Meath
- Guest number: 22
- Message: This is a test

At the bottom of the form is a "submit" button.

The following text was added to the message box.

Create New Booking

Booking date*
02/14/2027

Location*
9 Caisleán Mainéar, Athlumney, Navan, Co. Meath

Guest number
22

Message

This is a test. Updating this is a test message content.

G

submit

Upon clicking submit a message appears stating 'booking updated'. The updated booking is also visible in the bookings list.

Booking updated

Rebecca's Bookings

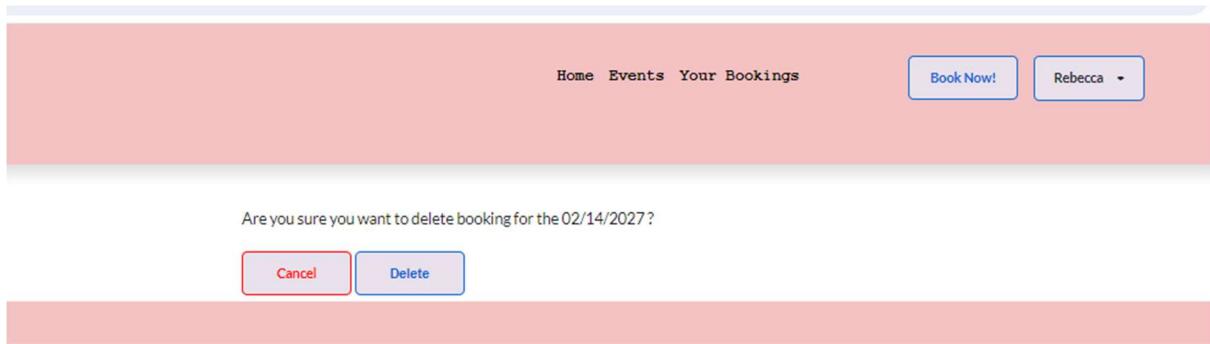

Date: 02/14/2027
Address: 9 Caisleán Mainéar, Athlumney, Navan, Co. Meath
Guest Numbers: 22
Message: This is a test. Updating this is a test message content.

Edit **Delete**

As a user I would like to be able to delete my booking.

Test: Click the delete button.

Upon clicking the delete button the user is given an option as to proceed. The booking date is used for reference.

Clicking the cancel button brings the user back to the bookings page and all bookings are still present.

However, clicking the delete button here presents the user with a 'Booking deleted' image and the booking is no longer present in the users 'bookings'. The booking instance has also been removed from the database.

A screenshot of the 'Rebecca's Bookings' page. The page title is 'Rebecca's Bookings'. There are two booking entries listed:

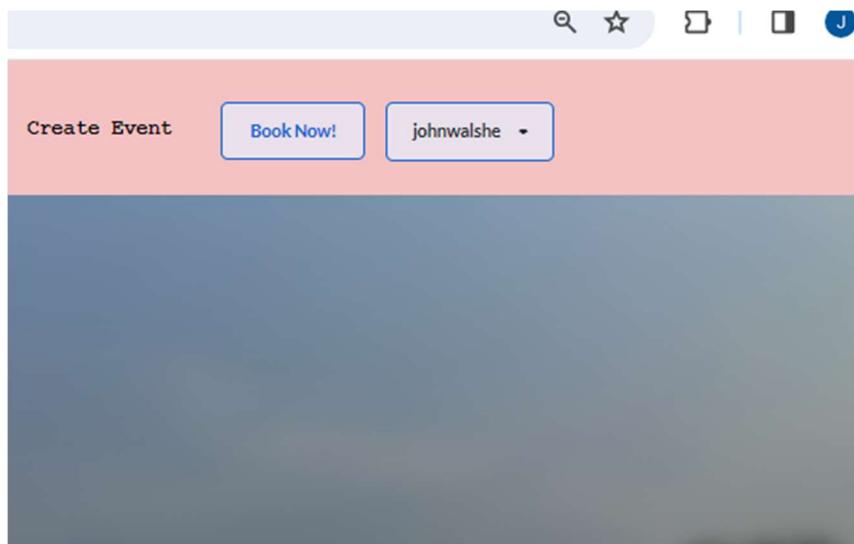

- Booking 1:** Date: 02/12/2024, Address: Thanks, Guest Numbers: 10, Message: Thanks. Buttons: Edit (blue), Delete (red).
- Booking 2:** Date: 14/02/2027, Address: ddsafa, Guest Numbers: 10, Message: let me book. Buttons: Edit (blue), Delete (red).

Testing 'Create Event'

As an admin I want to be able to add events that users can view

Test: Login in as a user with Admin status and expect to see a 'create event' option in the header.

Outcome: The 'Create Event' button is present as expected

As expected clicking the 'create event button' brings the admin to a create event page

A screenshot of a web page showing a modal dialog box. The title of the dialog is 'Add Event'. Inside, there are four input fields: 'Author*' with a text input field, 'Title*' with a text input field, 'Content*' with a large text area, and a file input field labeled 'Choose File' with the placeholder 'No file chosen'. At the bottom left of the dialog is a blue 'Submit' button. Above the modal, the main navigation bar is visible with links for Home, Events, Your Bookings, Create Event, and Book Now!.

The following form was submitted. It was expected that the admin would see this event, with the image in the 'Events' section.

Outcome:

This is a bug, as the author should be able to make more than one event.

Add Event

Author*

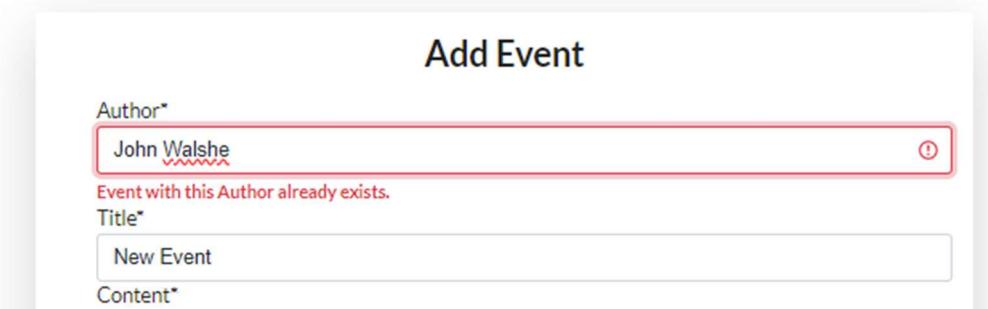

John Walshe

Event with this Author already exists.

Title*

New Event

Content*

The author field was removed. This form was then submitted.

Add Event

Title*

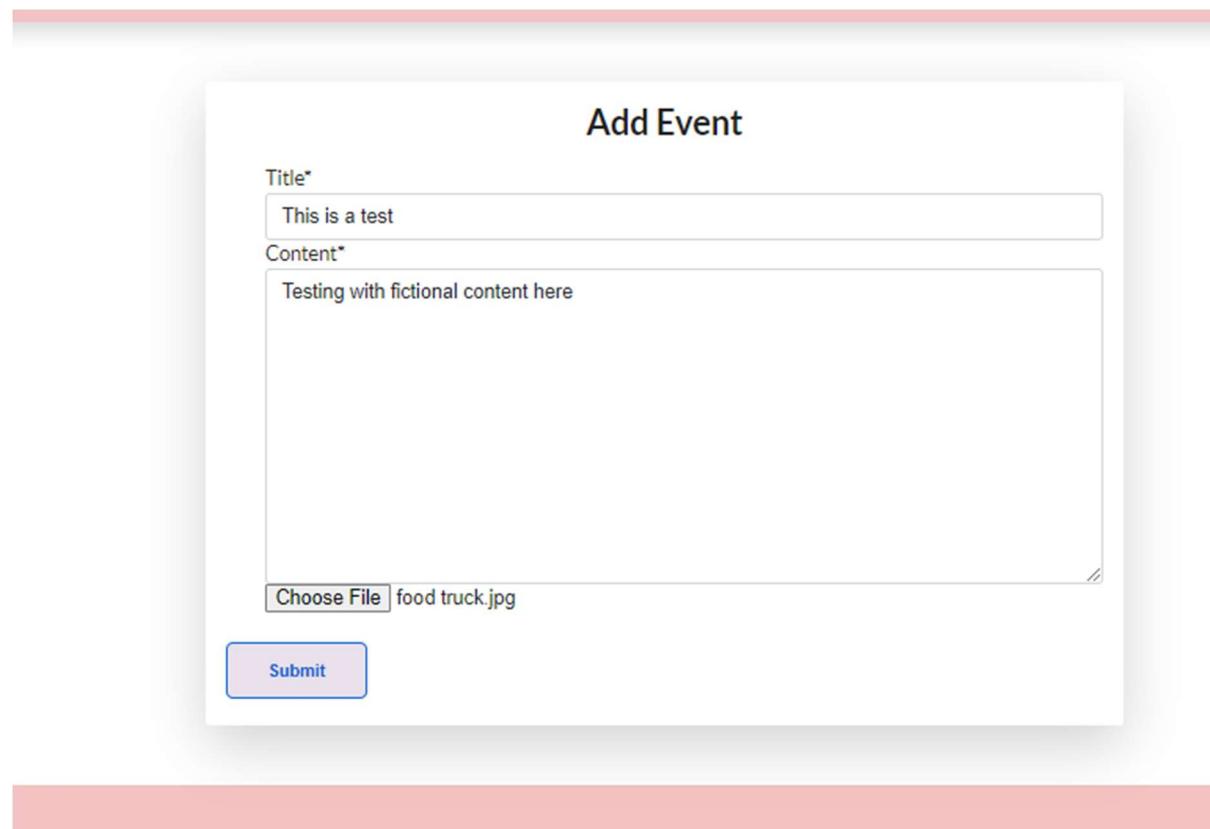

This is a test

Content*

Testing with fictional content here

Choose File food truck.jpg

Submit

Outcome: Test failed. The event was not submitted. The page just returned to the same page. Upon further investigation the removal of the 'status' field from the event entry form caused the error. Returning this field corrected this issue.

Add Event

Title*
test

Content*
This is test content in the event form

food truck.jpg

As expected the event image presents. However the image is too wide. Col-8 offset-2 from bootstrap fixed this

Author:
test

This is test content in the event form

Feb. 17, 2024, 8:48 p.m.

Test: Click the events update button. Expected outcome. Superuser redirected to event form.

As expected the superuser is brought to the Add Event form with the previous detail present.

The screenshot shows the 'Add Event' form with the following fields:

- Title***: test
- Content***: This is test content in the event form
- Image Preview**: Currently: images/food_truck.jpg (with a clear button) and Change: Choose File (No file chosen)

A blue 'Submit' button is at the bottom.

The screenshot shows the 'Add Event' form with the following fields:

- Title***: test
- Content***: This is test content in the event form. This is updated text.
- Image Preview**: Currently: images/food_truck.jpg (with a clear button) and Change: Choose File (No file chosen)

A blue 'Submit' button is at the bottom.

Test. 'This is updated text' is entered into the content section. Outcome: As expected, the updated text is present and the user is redirected to the events page. BUG However the 'clear' button does not work for the current image and a new image cannot be uploaded. By inserting crispy forms a red warning appears

The screenshot shows a file upload interface for an 'Event image'. The field is currently set to 'images/food_truck.jpg' with a checked 'Clear' checkbox. A red error message at the bottom states: 'Please either submit a file or check the clear checkbox, not both.' Below the field is a blue 'Submit' button.

If the user deletes an image and submits this then the image is deleted. Once deleted the user can edit the image again and put in a new image.

Below is the image erased

The screenshot shows an event form with an empty 'Event image' field. The field has a placeholder 'Choose File' and a file path 'bluffing-smal...200x900.jpg'. Below the field is a blue 'Submit' button.

New image attached

The screenshot shows a file upload interface for an 'Event image'. The field is currently empty, with a placeholder 'Choose File' and a file path 'bluffing-smal...200x900.jpg'. Below the field is a blue 'Submit' button.

New image successfully uploads

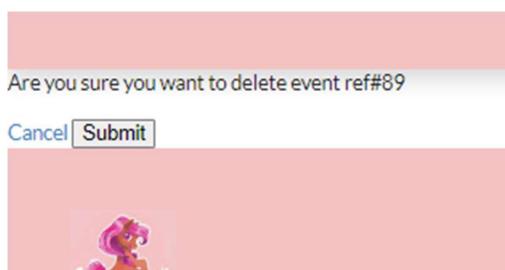

Feb.17, 2024, 8:48 p.m.

This is test content in the event form. This is updated text.

[Update](#) [Delete](#)

Test: Delete event by clicking delete button.

Outcome: As expected user is brought to 'Are you sure?' section

Clicking 'cancel' brings the user back to the events section. Clicking 'delete' successfully deletes the image.

Navigation Testing

Document checking completed.

Lighthouse testing

Application has passed lighthouse Accessibility Testing

Turned on laptop a day after updating images and lighthouse scores for index page all in green on first attempt. Changing the hero image from png to pweb seems to have improved the rendering time of the image.

Subsequent lighthouse testing 190324. The main issue appears to be a delay getting the server to respond. This may be due to my internet connection being weak.

Performance

Values are estimated and may vary. The [performance score is calculated](#) directly from these metrics. [See calculator.](#)

▲ 0–49 ■ 50–89 ● 90–100

[Expand view](#)

METRICS

■ First Contentful Paint

Pizza images should have initial size of 420x560px

Hero image should be initially 1800x1000

Show audits relevant to: All FCP LCP TBT CLS

DIAGNOSTICS

- ▲ Reduce initial server response time — Root document took 4,680 ms
- ▲ Largest Contentful Paint element — 5,060 ms
- ▲ Eliminate render-blocking resources — Potential savings of 350 ms
- ▲ Preconnect to required origins — Potential savings of 310 ms

Warnings: A `<link rel=preconnect>` was found for "https://fonts.gstatic.com" but was not used by the browser. Only use 'preconnect' for important origins that the page will certainly request.

Consider adding preconnect or dns-prefetch resource hints to establish early connections to important third-party origins. [Learn how to preconnect to required origins.](#) [FCP](#) [LCP](#)

URL	Potential Savings
FontAwesome CDN Cdn	310 ms
https://ka-f.fontawesome.com	310 ms
- ▲ Enable text compression — Potential savings of 29 kB

Upon further investigation it appears the delay for my hero image is largely due to 'server response time' which is related to my hosting. This may be due to using localhost.

Testing on Heroku shows a much better performance

herokuapp.com/

Accessibility Testing

Index page:

Accessibility score 77

I had to put aria labels on some links & improve the contrast between some text and its background. Also had to remove double selectors e.g. having an ID selector and class selector where just a class selector would suffice.

Despite having valid aria roles for both 'book now' buttons they continue to come up as not having valid roles

The screenshot shows the WAVE tool interface. At the top, there are four green circular icons with white text: 'WAVE', 'WCAG 2.1', 'CGL', and 'WCAG 2.0'. Below them is a progress bar with three green segments and one grey segment. A red warning icon is visible.

A red triangle icon with the text 'Values assigned to `role=""` are not valid ARIA roles.' is displayed. Below it, a message states: 'ARIA roles enable assistive technologies to know the role of each element on the web page. If the role values are misspelled, not existing ARIA role values, or abstract roles, then the purpose of the element will not be communicated to users of assistive technologies. [Learn more about ARIA roles](#)'.

The main area is titled 'Failing Elements' and contains two items:

- a.btn.btn-primary**: Shows a button labeled 'Book Now!' with a yellow border. A blue bracket highlights the button, and a callout box points to it with the text 'a.btn.btn-primary'.
- a#bknowlink**: Shows a button labeled 'Book Now!' with a yellow border. A blue bracket highlights the button, and a callout box points to it with the text 'a#bknowlink'.

At the bottom, a code snippet is shown:

```
{% if user.is_authenticated %}  
  <a href="{% url 'create_booking' %}" type="button" role="navigation" class="btn btn-primary">Book Now!</a>  
{% endif %}
```

All recommendations have now been addressed.

59	i.flag:not(.icon)	Property <code>font-smoothing</code> doesn't exist : <code>antialiased</code>

However all these 'errors' came from a CDN and not my custom css. Removing this cdn doesn't appear to lead to any issues with the sites functionality. This removed all errors.

The screenshot shows the W3C CSS Validator interface with a green header bar stating "Congratulations! No Error Found.". Below this, a table shows the validation results for the URL <https://nags-with-notions-f8a098968cba.herokuapp.com/> (CSS level 3 + SVG). The table shows 0 warnings and 0 validated CSS.

Jump to:	Warnings (253)	Validated CSS
W3C CSS Validator results for https://nags-with-notions-f8a098968cba.herokuapp.com/ (CSS level 3 + SVG)	0	0

Python testing

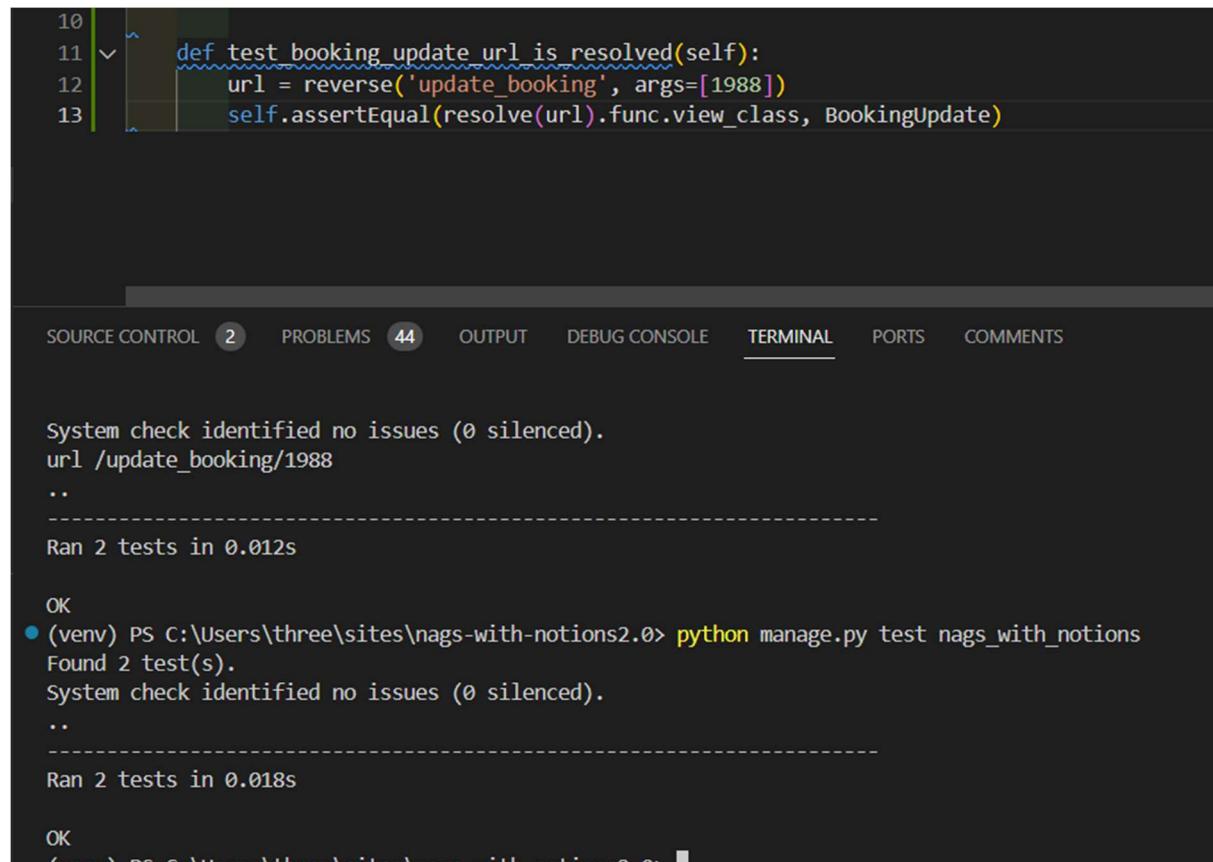

Using pytest I tested that the url names resolved to return the correct classes. The create booking url name 'create_booking' successfully resolved the BookingCreate class.

```
3   from booking.views import CustomLoginView, RegisterPage, BookingList, BookingCreate, BookingUpdate, BookingDelete
4
5 class TestUrls(SimpleTestCase):
6
7     def test_create_booking_url_is_resolved(self):
8         url = reverse('create_booking')
9         self.assertEqual(resolve(url).func.view_class, BookingCreate)
```

```
● FAILED (failures=1)
● (venv) PS C:\Users\three\sites\nags-with-notions2.0> python manage.py test nags_with_notions
Found 1 test(s).
System check identified no issues (0 silenced).
.
-----
Ran 1 test in 0.017s

OK
```

Test for update booking url which includes a pk as an integer was okay.

The screenshot shows a terminal window with the following content:

```
10
11 def test_booking_update_url_is_resolved(self):
12     url = reverse('update_booking', args=[1988])
13     self.assertEqual(resolve(url).func.view_class, BookingUpdate)

-----
```

Below the code, the terminal interface shows:

- SOURCE CONTROL (2)
- PROBLEMS (44)
- OUTPUT
- DEBUG CONSOLE
- TERMINAL**
- PORTS
- COMMENTS

```
System check identified no issues (0 silenced).
url /update_booking/1988
..
-----
Ran 2 tests in 0.012s

OK
● (venv) PS C:\Users\three\sites\nags-with-notions2.0> python manage.py test nags_with_notions
Found 2 test(s).
System check identified no issues (0 silenced).
..

-----
Your code has been rated at 4.19/10
```

I put a setting into vscode that removed white spaces. The ‘too many ancestors’ issue is related to importing the Django views, so this error is unavoidable. I also removed arguments from super(). These changes doubled my pylint rating.

The screenshot shows the VS Code interface with the terminal tab active. The output of the Pylint command is displayed:

```
② (venv) PS C:\Users\three\sites\nags-with-notions2.0\booking> pylint views.py
***** Module booking.views

At this point in testing I realised that the 'pizza' tab wasn't working. This required re-setting the Data-target. I also added some background color to the menu section. The events section seems to have an unnecessary margin above and below the event.

Bookings looks fine:

The screenshot shows a web application interface for managing bookings. At the top, there is a navigation bar with links for Home, Events, Your Bookings, Create Event, and Book Now! On the right side of the top bar are two small icons: one for job search and another for signing out.

The main content area is titled "johnwalshe's Bookings". It displays four separate booking entries, each enclosed in a light blue box:

- Booking 1:**

Date: 02/14/2027
Address: d12
Guest Numbers: 12
Message: testsdgs

[Edit](#) [Delete](#)
- Booking 2:**

Address: 9 Caisleán Mainéar, Athlumney, Navan, Co. Meath
Guest Numbers: 32
Message: please workjai

[Edit](#) [Delete](#)
- Booking 4:**

Date: 02/14/2027
Address: 9 Caisleán Mainéar, Athlumney, Navan, Co. Meath
Guest Numbers: 22

[Edit](#) [Delete](#)

Create event box could probably be wider

The screenshot shows a web application interface. At the top, there is a navigation bar with links for Home, Events, Your Bookings, Create Event, and Book Now!. On the right side of the navigation bar, there are icons for a user profile (John) and sign-out, along with two small square buttons containing symbols. Below the navigation bar is a large white rectangular form titled "Add Event". The form contains fields for "Title*" (with an empty input box), "Content*" (with an empty text area), and "Event image" (with a "Choose File" button and a message "No file chosen"). At the bottom of the form is a blue "Submit" button. The background of the page is light blue. At the bottom of the page is a pink footer section. In the top left of the footer, there is a small logo of a person with a ponytail. To the right of the logo, under the heading "CONTACT", are several pieces of contact information: "Sourdough Pizzas from Meats finest food producers", "0863371314", "caroline@nagswithnotions.ie", "0867506453", and "tamara@nagswithnotions.ie". To the right of these, there are social media links: "Facebook" (blue icon), "Instagram" (purple icon), "Github" (blue icon), and "LinkedIn" (blue icon). At the bottom left of the footer is the text "Copyrights all rights reserved", and at the bottom right is the text "Designed by John".

Book now box could also be wider/higher

The screenshot shows a web application interface. At the top, there is a navigation bar with links for Home, Events, Your Bookings, Create Event, Book Now!, and a user account section for John. Below the navigation bar is a "Create New Booking" form. The form fields include: Booking date*, Location*, Guest number, and Message. A "submit" button is located at the bottom of the form. In the footer, there is a sidebar with text about sourdough, pizzas, meatballs, and food producers. The main footer contains copyright information, social media links for Facebook, Instagram, Github, and LinkedIn, and a note that it was designed by John.
